

Project Profile

Project: Switchboards and HVAC control MCC Supply
Location: Dili - East Timor
Client: New Zealand Government
Consultant: Cosgrove Major
Project type: Distribution & Mechanical Services

Man hours: 150
Duration: 3 weeks
Completion Date: Sep-08

Description of Site

The Ministry of Foreign Affairs contracted Leighs Construction to build a new NZ Embassy in Dili, East Timor. The project consisted of a new Embassy building, a three bedroom residence, pool house, guard houses, all within a secure compound.

Description of Project

AML Switchgear were contracted to build the Main switchboard and subsequent distribution and control panels for the general power reticulation, generator back up & ATS, building mechanical services/ HVAC controls and lighting control.

The panel was fully commissioned before freight to Dili so the local electrical contractor only needed to connect all field and point to point wiring to respective terminals and then live.

The project was completed on time and within budget.
